The father and son team of Lester and Mark Anderson first established ANRAK CORPORATION back in 1976 out of Sacramento, California. ANRAK has the dubious honor of being one of the very first contractors on the west coast to specialize in asphalt concrete grinding, roadways and parking lots. In addition, the company offers a unique spin to their services with the ability to fine mill asphalt concrete from bridge decks or other surfaces. Today, with more than 50 employees, ANRAK provides their services throughout all of California and Nevada.

ANRAK maintains the largest fleet of milling machines and recently added a Wirtgen W 200i purchased from Nixon-Egli Equipment Co. Mark Anderson, Owner, ANRAK comments: "We go with Wirtgen profiling machines because Wirtgen offers today's most advanced technology, as well as superior productivity out in the field. Our new Wirtgen W 200i was the first one delivered here in California. We want to be on the forefront of maintaining green technology and remain carb compliant, while keeping our fleet upgraded with today's newest equipment offerings. Our field team requests Wirtgen machines because of their workability. They are user-friendly and the performance towards grade control and vertical cuts are second to none."

Mark continues: "Another reason we bought the Wirtgen W 200i is due to its size and mobility. Most of our work is in Northern California, Central Valley, and the Bay Area. Work in areas like San Francisco requires a machine that is accessible and moves well in tight spaces, not to mention easy to transport. The cities and counties up here are pleased with our new Wirtgen W 200i because of its green components and productivity in urban areas."

Tom Schmidt, Vice President, ANRAK adds: "Anrak is a customer driven company that works day and night to support its customers needs with the help and support of Nixon-Egli. David Cucinelli, their sales representative, did a great job for us. He was very knowledgeable about the product and provides great product support. Randy Davis, parts manager, is available 24/7 and always works hard to keep us up and running. Everyone at Nixon-Egli is dedicated to keeping our business on the leading edge and that makes for a great partnership."

## NIXON-EGLI EQUIPMENT CO.
