In 2005 Lars Ingerslev established Competitive Asphalt Coatings, Inc. with a focus on asphalt maintenance and rehabilitation. His company is based out of Riverside and they work primarily in California, with licenses in Arizona and Nevada. Competitive Asphalt Coatings, Inc. has built a reputation for their outstanding work on commercial and private parking lot rehabilitation, but they also shine in the residential and public works arena as well. There are over 40 full-time employees that make up two pave and patch crews, three striping crews, three seal coat crews and an office staff of 11 hard working individuals.

Competitive Asphalt Coatings, Inc. currently own and operate two LeeBoy paving machines including their 8500 and their brand new LeeBoy 8510C just recently purchased from Nixon-Egli Equipment Co. "Our operators prefer the LeeBoy machines because of their ease of operation and the state-of-the-art controls," said Lars Ingerslev.

One of the legendary features that make the Leeboy machines preferable is the Legend Screed System, which produces seamless mats up to 15 feet in width. Other positive feedback regarding this machine is that it is simply easier to transport. "We can fit the LeeBoy paving machine, our roller and our skidsteer all on one trailer," continues Lars.

"I just can't say enough about the Nixon-Egli team," adds Ingerslev. "The entire Nixon-Egli staff does their job and they do it well. Starting with our sales representative Allen Hahn, who is a very tenacious individual. Once he knew we were ready to buy he was there to educate us on the LeeBoy paver and he is very knowledgeable about his product. The service department at the Ontario branch has been great, they always have parts availability and they have helped me get right back to work many times. I really value our relationship and I plan to keep growing my business with the help of Nixon-Egli. When you have a good partner like Nixon-Egli Equipment Co. it just makes doing business easier."
