(Above) G.M. Sager Construction Co., Inc.'s brand new Vögele Super 700 paving machine from Nixon-Egli Equipment Co.

Gary Sager started out in 1980, performing small asphalt repairs from the back of his pickup truck. His family owned construction company, G.M. Sager Construction Company, Inc. (G.M. Sager), has come a long way since those first days when Gary broke up asphalt with a sledgehammer and removed it with a pickaxe.

Today, G.M. Sager is a diversified general engineering construction business with 35 employees that offers a wide range of construction capabilities. G.M. Sager is centrally located in Pomona and performs work in Los Angeles county, Orange County and San Bernardino County. They are known throughout the industry, for their impeccable work performing asphalt repairs, trench paving, parking lot construction, grinding, pulverizing, slurry seal and striping. They also have a very capable concrete division that performs curb and gutter, cross gutter, ADA ramps, bus pads, sidewalks and much more. Additionally, G.M. Sager provides rough and fine grade services including site cleanup, material import/export, over excavation, rock base and soils testing capabilities.

G.M. Sager recently purchased a Vögele Super 700 paving machine from Nixon-Egli Equipment Co. for their trench resurfacing projects. The Vögele Super 700 is designed to operate in confined work areas and is equipped with a track gauge of 3 feet 7 inches and a clearance width of 4 feet. Mike Sager serves as the corporate secretary for the family business and he comments, "The electrically heated AB 200 V screed paves widths from 20 inches to 10 feet 6 inches. The screed allows paving up to within 2 inches of obstacles such as walls, trees, and curbs. Each wing of the 5.5-ton hopper can be raised independently, and there are three individual, reversible drives for the conveyor and each auger." He adds, "The Vögele Super 700 is a superior machine that lays a very nice, smooth mat very quickly. Although it is a compact machine, the hopper can accommodate a full-size dump truck and is outfitted with state-of-the-art controls."

G.M. Sager has been doing business with Nixon-Egli Equipment Co. for many years. "Nixon-Egli has always treated us fairly and been there for us when we needed them with excellent support. When we needed a compact paving machine, we didn't look anywhere else," says Sager. "They are conveniently located in Ontario and their sales representative, Alan Hahn, is an asset to them, as well as to us. He is very knowledgeable and always goes out of his way to make sure that we have everything we need. Nixon-Egli is a superior company that we will continue to do business with in the future."
