MCK Services, Inc. is a Northern California General Engineering Contractor that specializes in public works street reconstruction projects, private and commercial grading and paving projects as well as utility trench paving. They have been located in Contra Costa County for over 19 years and have approximately 80 employees. From their humble beginnings to their current position as a premier public works paving contractor, MCK Services, Inc. has always prided themselves on quick efficient delivery of a project.

Since their work experience ranges from parking lot paving, subdivisions, city streets, utility trench paving and local highways and freeways for Caltrans they need equipment they can rely on. Their fleet of equipment is very modern and continually being updated. MCK Services, Inc. owns and operates an extensive fleet of paving and milling machines. They purchase most of their equipment from Nixon-Egli Equipment Co. They currently own 9 paving machines and 6 Wirtgen milling machines; their most recent purchase is a Wirtgen 3800 CR cold-in-place recycling machine.

Mark Hazen, Owner, MCK Services, Inc. comments, "The Wirtgen 3800 CR is the first recycling machine we've purchased. In order to be more compliant and to be able to bid certain projects we felt it was time to invest in this machine. One of the best features of the 3800 CR is that it offers the ability to cold-in-place recycle a full lane of pavement in one pass, stabilizing with foamed asphalt "green mix" or any other stabilizing medium. Other features our operators like are the ease of operation that makes milling and recycling almost effortless. The Wirtgen 3800 CR has impressive maneuverability for a machine of this size, the maintenance and transport of the 3800 CR are also very user-friendly."

Hazen adds, "We've done a lot of business with Nixon-Egli Equipment Co. over the years and we know they are someone we can trust. Whether it's milling machines or paving machines they have always taken care of us. Their salesman Denny Johnson has been at Nixon-Egli for over 30 years. He knows equipment and the industry like no other. When you're looking for quality equipment and product support you don't need to look any further than Nixon-Egli Equipment Co."
